

Mastic asphalt dumper

Special equipment for the transport of mastic asphalt at the construction site

- Fully hydraulic drive with infinitely variable hydrostatic brake
- The fully hydraulic steering provides for excellent manoeuvrability and safe operation under the most difficult conditions
- Powerful, quiet water-cooled four-cylinder diesel engine
- Large agitator with low filling flap height
- Powerful single-level agitator with two paddles, hydraulic chain drive
- The dumper can be equipped with a particulate filter.

Technical details:

Description	Dumper D 0.6 HP
Pot volume	approx. 620 L
Drive engine type	Yanmar diesel engine, water-cooled
Engine power	36.9 kW at 3000 1/min
Agitator drive	Single-level with hydraulic engine and drive chain
Steering:	Fully hydraulic
Drive	Fully hydraulic with electric. automatic drive, infinitely variable from 0-18 km/h
Brake	Hydrostatic
Discharge actuation mechanism	Mechanically, from the driver's seat
Deadweight	approx. 2000 kg
Length	approx. 3400 mm
Width	approx. 1800 mm
Filler cap height	approx. 1080 mm
Filler cap size	approx. 500 mm x 380 mm
Discharge size	approx. 280 mm x 180 mm

Subject to technical changes.
