

RVK 200i vertical mobile/stationary

Equipment for melting and processing bituminous joint and rail sealing material.

- Compact design, low weight, quick heat-up time
- High melting power via heat transfer oil with low gas or heating oil consumption
- Hose pre-heating box and safety filling lid are standard features
- Internal sealing unit
- Vertical agitator hydraulically driven
- Single-axle chassis with overrunning and hand brakes
- Height adjustable drawbar
- Devices available with axle friction wheel drive with steering rod or radio remote control
- Lighting and TÜV acceptance, optional DIN coupling ring or ball hitch for cars
