

Unimog setup

Bitumen spray structures are manufactured according to customer specifications.

Unimog-setup with the following features:

- 1500 l bitumen spray tank with an oil burner heating system and temperature control, 60 mm isolation and level indicator
- Variable spray bar with a maximum spraying range of approx. 3,400 mm
- Computer-controlled spray quantity regulation, depending on speed
- All spray nozzles can be switched on individually from the driver's cab
- 1000 l diesel tank for supplying construction sites
- 1000 l water tank for operating the broom

Thanks to many years of cooperation of Mr. Maximilian Straßmayr, co-founder and former managing director of Straßmayr GmbH Adlwang Austria, who held the position as the technical manager in the field of bitumen emulsion and patch technology, we successfully established ourselves in the market and complete numerous projects with success.
